Model DTI050 and STS-100 series Digital Temperature Indicator and STS Reference Sensor

PRODUCT DESCRIPTION

The JOFRA DTI050 handheld digital temperature indicator, offers a measurement accuracy to $\pm 0.012^{\circ}\text{C}$.

Combined with an accurate JOFRA STS-100 temperature reference sensor, the DTI050 temperature reference indicator is the perfect reference thermometer.

Features

This simple to use instrument offers great flexibility, being able to work with both 'smart' and standard temperature sensors. A fast response time ensures precise monitoring of temperature stability and low drift reduces uncertainty of measurement between calibration intervals.

Use the JOFRA DTI050 and the STS sensors as the working temperature reference in any calibration application or use the set-up directly for critical measurements in the process.

The superior specifications, combined with a long history of reliability and low drift, make the JOFRA DTI050 and the JOFRA STS sensors the perfect choice.

The graphical display makes it is easy to recognize the status of the instrument and take readings. The DTI050 may also handle signals from 4-wire RTD's, TC's and thermistors.

JOFRA DTI050 INDICATOR

Graphical display

Large digits display the temperature, info lines show current status and mode, and the small digits show the details of the sensor.

Indicator for low battery

Running low on battery an icon in the display clearly shows this.

ON / OFF

Auto shut-off to extend battery life (user-programmable).

Resolution

1 °C - 0.001 °C. Maximum resolution depends on the selected sensor type.

Hold

Makes it possible to “freeze” the results when doing measurement. The results are saved in the EEPROM, when it is switched off.

External power supply

It is possible to connect the DTI050 to external 9V supply.

Intelligent sensor reading

Capable of reading calibration data and other information from the memory of the sensor.

Input

1 input channel with 6-pin REDEL connector.

Type

Select type of sensor. When using an STS reference sensor with intelligence, the indicator automatically finds the sensor and the data.

Serial interface

RS232 serial interface to communicate with JOFRACAL calibration software. Also used if adjustment of the unit is necessary.

See spec. sheet SS-CP-2510 for more info about JOFRACAL

MAX / MIN

Reads the highest and lowest value from last reset. Monitor a safety alarm or look for temperature spikes in the process. Min and max are saved in the EEPROM, when it is switched off.

JOFRA STS REFERENCE SENSORS

To get an ideal reference system, JOFRA offers a range of reference sensors. JOFRA STS Superior Temperature reference Sensors are based on more than 50 years of industrial temperature sensor manufacturing experience. The main requirement of a reference sensor is stability: The less the sensor drifts, the lower the measurement uncertainty. All JOFRA Superior Temperature Standard sensors are economical and offer fast response times, low immersion depths, compact physical sizes, and specified low drift rates: even at high temperatures. These are all important considerations when selecting a reference sensor.

All sensors are supplied with an accredited or traceable certificate stating the sensor coefficients.

Please find more information about our STS reference sensors in specification sheet AS-CP-2210, which is available at www.jofra.com
