Handheld Pressure Calibrator HPC550Ex Family

Intrinsically
safe

JOFRA HPC550/552Ex calibrators feature deadweight tester accuracy in a modern digital package.

The HPC550/552Ex can be used in a very broad range of applications from simple tool type jobs to complex calibration jobs in custody transfer systems. Including potential hazardous areas in Oil, Gas and Chemical industries.

The HPC550/552Ex series has been designed to meet high accuracy pressure calibration applications and facilitate your tasks. HPC550/552Ex offers features such as user configurable information display, 15 different pressure units, transmitter supply, mA input, % error calculation, voltage measurement, serial communication, and external pressure module capability. The accuracy of the HPC550/552Ex calibrators is specified in % of reading to ensure an even better accuracy and wider applicable pressure range. The HPC is temperature compensated from 0 to 45°C/32 to 113°F for on-site operation. It is a truly superior pressure calibrator for laboratory and field use, bringing laboratory accuracy into the field.

The pressure calibrator of choice in potential explosive atmospheres. The intrinsically safe HPC550/552Ex calibrators complies with ATEX / IECEx certifications and are an extension of JOFRA's well known pressure calibrator range.

HPC550/552Ex meet the needs of technicians who install, maintain, calibrate and troubleshoot equipment in petro-chemical plants, on oil platforms, in refineries, governmental bodies, commercial organizations and any location subject to the risk of potential explosion hazardous atmospheres.

AMETEK[®]
TEST & CALIBRATION INSTRUMENTS

Clear graphical display

Large backlit graphical display shows current status and mode, 1, 2 or 3 measurement windows, to suit your applications and demands.

Full set of features

Perform semi-automatic pressure switch tests, leak test, % error calculation, switch in HART resistor or other calibration tasks through the outstanding functions and features of the HPC550Ex.

Intuitive menu system

Combination of “soft keys” and cursor keypad ensures easy operation.

Temperature measurement

High accuracy temperature measurement port by use of the optional Pt100 sensor. A superb instrument for easy and convenient temperature measurement.

Electrical connections

HPC calibrators are well equipped and include inputs for mA, switches and temperature measurements.

Units

15 different engineering units on pressure measurements.

Zero

To keep high accuracy, a dedicated zero button is available to provide convenient zero before test.

ON / OFF

Auto shut-off to expand battery life time (user programmable).

Pressure connections

Adapters to 1/4” NPT male and 1/4” BSP female are included as standard.

What is an Ex area?

Ex areas can be known by different names such as “Hazardous Locations”, “Hazardous Areas” “Explosive Atmospheres”, and the like and relate to areas where flammable liquids, vapours, gases or combustible dusts are likely to occur in quantities sufficient to cause a fire or explosion.

The modern day automation of industry has meant an increased need to use equipment in Ex areas. Such equipment is termed “Ex equipment”.

Where do you commonly use Ex equipment?

- Automotive refueling stations or petrol stations
- Oil refineries, rigs and processing plants
- Chemical processing plants
- Printing industries, paper and textiles
- Hospital operating theatres
- Aircraft refueling and hangars
- Surface coating industries
- Sewerage treatment plants
- Gas pipelines and distribution centers
- Woodworking areas
- Sugar refineries

What is ATEX?

The ATEX directive consists of two EU directives describing which equipment and work environment is allowed in an environment with an explosive atmosphere.

ATEX derives its name from the French title of the 94/9/EC directive: Appareils destinés à être utilisés en ATmosphères EXplosibles.

Where does ATEX apply? All the 24 member countries of the European Union, plus Norway, Iceland and Liechtenstein, are subject to the directives.

What is IECEx?

The objective of the IECEx System is to facilitate international trade in equipment and services for use in explosive atmospheres, while maintaining the required level of safety, to offer:

- International confidence in the product assessment process
- HPC Ex family is certified by CSA, stating IECEx being the certification of the future for America
- Maintaining International Confidence in equipment and services covered by IECEx Certification

- Proof pressure - maximum allowable pressure without a shift in calibration.
- Burst pressure - sensor damaged or destroyed, some risk of personal injury.
- Static pressure - differential units only. Maximum allowed common mode pressure between both points.
- Compound ranges - the data for the 1 bar range also applies to the -1 to +1 bar compound range, the data for the 2 bar range also applies to the -1 to +2 bar compound range.
- Absolute ranges - the data for the 1.1, 2, 7 and 20 bar ranges also applies to the absolute pressure versions of those ranges.

STANDARD DELIVERY (HPC Calibrator)

- HPC550Ex or HPC552Ex calibrator
- Traceable calibration certificate (NIST) with pressure and vacuum performance
- 4 x 1.5 volt batteries
- Test leads: red and black
- User manual

ACCESSORIES

Useful soft case - Option C

Not to be used in hazardous areas!

The HPC550Ex can be delivered with a soft case as an option. The handy soft case is designed for protection during transport. The soft case has separate compartments for HPC550Ex (w/Velcro strap), test leads, test hoses, temperature probe, and JOFRA APM pressure module. A shoulder strap ensures convenient transportation when climbing ladders, etc. and the handy strap on the back makes it possible to hang the instrument on a valve, ladder etc. The manual and calibration documents fit into a pocket on the front of the soft case.

Temperature sensor - Option T

To utilize the thermometer utility of the HPC550Ex family, a ruggedized handheld temperature sensor is available. The sensor comes as a ready-to-use probe with handle and coiled cable with LEMO connector for HPC550Ex and HPC552Ex. The sensor is built with a high accuracy Pt100 element, accuracy $\pm 0.05^\circ\text{C}$ / $\pm 0.27^\circ\text{F}$. Sensor dimensions, without handle and cable, $\varnothing 4 \times 200$ mm/stainless steel.

AMETEK Test & Calibration Instruments

A business unit of AMETEK Measurement & Calibration Technologies Division offering the following industry leading brands for test and calibration instrumentation.

JOFRA Calibration Instruments

Temperature Calibrators

Portable dry-block calibrators, precision thermometers and liquid baths. Temperature ranges from -90°C (-130°F) to 1205°C (2200°F). Temperature sensors for industrial and marine use.

Pressure Calibrators

Convenient electronic systems ranging from -25 mbar to 1000 bar - fully temperature-compensated for problem-free and accurate field use.

Signal Instruments

Process signal measurement and simulation for easy control loop calibration and measurement tasks.

M&G Pressure Testers & Pumps

Pneumatic floating-ball or hydraulic piston dead weight testers with accuracies to 0.015% of reading. Pressure generators delivering up to $1,000$ bar.

Lloyd Instruments

Materials testing machines and software from Lloyd Instruments guarantees expert materials testing solutions. The comprehensive program also covers Texture Analysers to perform rapid, general food testing and detailed texture analysis on a diverse range of foods and cosmetics.

Davenport Polymer Test Equipment

Allows measurement and characterization of moisture-sensitive PET polymers and polymer density.

Chatillon Force Measurement

The hand held force gauges and motorized testers have earned their reputation for quality, reliability and accuracy and they represent the de facto standard for force measurement.

Newage Testing Instruments

Hardness testers, durometers, optical systems and software for data acquisition and analysis.
