

Portable SDI Test Kits

Completely assembled in a portable, compact case, ready for on-site testing. Includes ASTM instructions for measuring silt density index. Minimum of 30 PSI water pressure required. Optional Pump Assembly Kit available for pressures below 30 PSI.

SDI-2000

Silt Density Index Test Assembly

Assembled with:

- Filter Holder
- Pressure Gauge
- Pressure Regulator
- Ball Valve
- Graduated Cylinder
- Thermometer
- Tubing
- Filter Tweezers

Filters sold separately (SDI-045)

direct SDI[™]

Pump Assembly Kit for testing with less than 30 psi. Assembled with Booster Pump, Power Supply, and Pressure Regulator. This is available in three voltages:

- SDI-PU: 115-120VAC, 60Hz
- SDI-PE: 230VAC, 50Hz
- SDI-PJ: 100VAC, 50-60Hz
