

High Speed Release

Production speed testing of PSA release liners is simple with the durable, easy-to-use High Speed Release Tester from ChemInstruments. Together with the included EZ-Lab system software, the release tester determines profiles of release liners in a matter of minutes. Whether trying to determine high-speed application characteristics or converting properties, this valuable adhesive testing tool will provide insight into the performance properties of release liners. This machine was designed specifically to comply with the procedures set forth in FINAT test method FTM 4.

- Rugged construction, capable of withstanding the abuse of the production environment
- Digital speed control with encoder feedback
- Selectable speed range from 30 to 1000 fpm (10 - 300 mpm)
- Designed to utilize the sample size indicated in the FINAT FTM 4 test method
- Capable of testing liner from adhesive or adhesive from liner
- 5 pound load cell is included with the machine
- Operating temperature range 32° - 150° F (0° - 70° C)
- Capable of stand-alone operation with integrated digital display
- EZ-Data data management software is included with this machine
- Data can be downloaded to EZ-Data software for complete data management
- Accurate to $\pm 0.1\%$ of load cell range
- Capable of pulling up to 5 pounds (2.2 Kg)
- Universal input voltage - 85-265 VAC (50/60hz)

Data Acquisition System

The ChemInstruments electronic data acquisition system is a state-of-the-art microprocessor controlled force measurement package that combines accuracy with ease of use. This system simultaneously controls test motion, reads the force of a test from a load cell, digitally displays it and also stores that data in its memory.

- Records 400 data points per second during a test interval
- Displays the average, high and low measured force results immediately upon completion of a test
- Export data by USB connection to a local PC with our EZ-Data software
- Displays test values in grams, kilograms, ounces, pounds or Newtons
- 5.7 inch touch screen display
- 2 and 10 pound load cells are optional

Tape Specimen Cutter

Tape Specimen Cutter: A double razor blade sample cutter cuts samples to a precise 2 inch width. Other sizes available.

EZ Lab compatible

PSTC Testing Kit
TLMI Testing Manual

EZ-Data System Software

EZ-Data Management software interfaces with all of ChemInstruments' load cell based testing platforms. The software is a very simple and intuitive way to get more out of your testing equipment. EZ-Data Management software provides test data results in report-ready format. This easy to use software provides powerful statistical analysis and reporting capabilities on any Microsoft Windows based personal computer.

EZ-Data Software Features

- One main screen contains all commands to easily setup and operate each machine
- Test data is automatically graphed upon test completion
- Pertinent data points are highlighted on the graph page for easy reference
- Files are automatically saved in the root directory for security purposes
- Files may also be saved anywhere on a local network

- Test data files are transferable across networks and the Internet
- Test results can be shared in Adobe .PDF file format.
- Up to 5 graphs can be overlaid for comparison purposes
- Up to 99 tests can be tabulated for statistical analysis
- Convert EZ-Data files into Microsoft Excel files with one click
- Graph cropping feature provides more detailed analysis and selected views
- Previous tests are always available for review

EZ-Data Management software can be used with the following test equipment:

Adhesion / Release, Tensile / Compression, Probe Tack, Loop Tack, High Speed Release, 90° Peel Adhesion, 180° Peel Adhesion, Coefficient of Friction, High Speed Unwind, Burst / Perforation, Probe Material Analyzer.

EZ-Data Management software provides a complete testing and reporting platform for R&D, QC, and shop floor testing and data management. Combined with any of our pieces of testing equipment, this software is a very powerful addition to any lab that requires advanced data management and reporting for traceability or ISO purposes.

System Requirements

- Personal Computer operating Microsoft Windows 2000 or newer
- 4 MB of RAM
- Pentium processor, 200 MHz or higher
- RS-232 COM port or USB with converter to RS-232
- 3MB of hard drive space

Accessories

Water Vapor Cup

The sturdy cast aluminum WV-100 Water Vapor Cup is used in the test methods PSTC-34 and ASTM D 3833 water vapor transmission and PSTC-35 and ASTM D 3816 water penetration tests.

Double Sided Tape

A versatile 2 sided tape used in conducting release and coefficient of friction testing.

Calibration Weight

TW-CAL Calibration Weight Set: Brass calibration weight set with hooks. This set includes a selection of weights from 10-1000 grams that are traceable to NIST standards. An optional certificate is offered.

Adhesive Remover

A unique water-soluble solvent-based cleaner of exceptional dissolving power. It offers relatively high safety, and reduces cleanup labor.

Swing Arm Sample Die Cutter

DC-500

The Swing Arm Sample Die Cutter is ideal for producing samples from paper, film, foil, label, tape and a wide variety of other materials. The Die Cutter employs a safe, manually operated, cam actuated cutting stroke to produce samples with standard Steel Rule and Clicker dies. It is simple to use and eliminates the risk of injury associated with hammering hand held dies when making samples.

- Rugged construction, capable of withstanding the abuse of the production environment
- Quick and easy to operate and maintain
- Upper platen dimensions of 8" x 8" (20 cm x 20 cm)
- Lower platen dimensions of 9" x 11" (23 cm x 28 cm)
- Long-life and replaceable lower platen cutting pad made of nylon
- Easy adjustment for stroke and height changes

- Upper platen and leverage arm swing away for easy access during setup
- Mounts to work table for hazard free operation
- Dies available on request, but not included with the unit
- Single cavity Clicker dies available in standard and custom shapes
- Multiple cavity Clicker dies available in custom shapes
- Various tolerance dies available from $\pm 0.005"$ (0.127 mm) to $\pm 0.015"$ (0.381 mm)

Sample Cutters

SC-100
SCF-100

These specimen tape cutters simplify cutting samples for ASTM, FINAT, PSTC Appendage B, 2.4, AFERA and TLMI procedures. Extra blades and custom sample cutters are available. Contact ChemInstruments for more information about custom design specimen tape cutters.

Specimen Tape Cutters

- 1" Specimen tape cutter
- 1/2" Specimen tape cutter
- 24 mm Specimen tape cutter
- 12 mm Specimen tape cutter

Shear Cutoff Fixture

- Quickly and accurately cut a shear sample to a 1" x 1" (2.5 cm x 2.5 cm) contact area
- Meets the requirements of ASTM, FINAT, PSTC, AFERA and TLMI standards
- 1/2" x 1/2" (1 cm x 1 cm) fixture is also available upon request

Hand Rollers

HR-100
HR-102

4.5 pound Hand Roller & 10 pound Hand Roller

- 4.5 pound (2045g) roller features a steel core with a shore scale A 80 durometer silicone rubber cover
 - Diameter of 3.75" (95 mm) and a width of 1.75" (45 mm)
- 10 lb (4540 g) roller features a solid steel core with an 8 RMS polished surface
 - Diameter of 5.00" (127 mm) and a width of 1.75" (45 mm)
- Legs on handle extend beyond the circumference of the roller to protect roller surface
- Slots on handle allow roller axles to "float" only the weight of the roller during operation
- Meets the requirements of PSTC Appendage B, 2.8 and other industry standards

FINAT Hand Roller

- 2 Kg (4.4 pound) roller features a steel core with a shore scale A 80 durometer silicone rubber cover
- Diameter of 85 mm (3.34") and a width of 50 mm (1.97")
- Legs on handle extend beyond the circumference of the roller to protect roller surface
- Slots on handle allow roller axles to "float" only the weight of the roller during operation
- Meets the requirements of FINAT standard 2.1

Custom design rollers made to nearly any customer specification

Rolldown Machines

RD-1000
RD-3000

The Rolldown laminates an adhesive coated material to a test substrate. The prepared sample can then be used in a number of differing test procedures. The mechanics of the Rolldown ensures that test samples are prepared at a stable laminating speed and with consistent pressure. The Rolldown comes in two versions. The single roll version prepares one sample at a time. The triple roll version reduces sample preparation time by accommodating three samples at a time. Both machines meet the requirements of PSTC Appendage B, Section 2.7 and ASTM D 3330 Section 5.4. The Rolldown is one of a handful of devices that are a must for any development or QC laboratory that wishes to ensure the highest quality data. Properly prepared samples help create accurate and credible data.

- Rugged construction, capable of withstanding the abuse of the production environment
- Simple, one-touch operation creates very repeatable test samples
- 4.5 lb (2 Kg) steel roll with Shore A scale 80 durometer rubber covering
- Steel roll is nickel plated to eliminate corrosion
- Thickness of rubber covering is 1/4" (6 mm)
- Finished roll dimensions are 1.78" (4.5 cm) wide and 3.75" (9.5 cm) in diameter
- Selectable set speeds include:
 - Older laminating speed of 12 ipm (30 cpm)
 - Newer "harmonized" speed of 24 ipm (60 cpm)
- Accepts test panels up to 2" x 8" (5 cm x 20 cm)
- Adjustable stroke length from 1" to 10" (2 cm - 25 cm)
- Capable of selecting from 1 to 9 repeat cycles
- Continuous cycling mode selectable
- Operating temperature range 32° - 150° F (0° - 70° C)
- Standard input voltage - 120 VAC (50/60hz)

Test Panels

The 304 stainless steel meets the requirements set forth in ASTM A666. The panels comply with PSTC Appendage B 2.6. The 18 gauge panels have the Bright Annealed finish and are cut to size for use in various test methods.

All Stainless steel panels are 0.047" (1.2mm) thick.

Standard sizes include:

Loop Tack

TP-16 (1"x6") (2.5cm x 15cm)

TP-13 (1"x3") (2.5cm x 7.5cm)

Shear

TP-23 (2"x3") (5cm x 7.5cm)

Adhesion

TP-25 (2"x5") (5cm x 13cm)

TP-26 (2"x6") (5cm x 15cm)

TP-28 (2"x8") (5cm x 20cm)

TP-39 (3"x9") (7.5cm x 23cm)

Specialized Panels*

Glass: 1/8" (0.3cm) thick

Plastics: 1/8" (0.3cm) thick

High Density Polyethylene (HDPE)

Low Density Polyethylene (LDPE), 1/4" (0.5cm) thick

Co-Polyester (PETG)

Polypropylene (PP)

Polycarbonate(PC)

Polyvinylchloride (PVC)

Polystyrene(PS)

ABS Plastic

Acrylic

Aluminum: 1/16" (0.15cm) thick

AFERA Stainless Steel Panels

**Specialized Panels do not meet ASTM D 3330 Specs.*

Standard panel sizes as well as custom dimensions are available in the above materials.

Test Panel Holder – Wooden holder with 22 angled slots to hold panels between tests. Dimensions: 16" (41cm) long x 3.5" (9cm) wide.

Custom Design Services

Let ChemInstruments work with your team to develop a complete testing platform for your unique needs. We can build a simple fixture to help secure your specific sample in the proper orientation or we can design an entire product system for your worldwide manufacturing needs. You can count on our experience to build you a highly functional and precise platform at a reasonable cost and all in a timely manner. We have been helping our customers think outside the box for decades. The next time you have a difficult process to test and can't figure how to get out of the box, think of us. We'll help get you a custom designed and built device that will exceed your expectations.

Areas of expertise:

- Test fixtures
- Modifications to our standard products
- Coating machines
- Laminating machines
- Sample preparation devices
- Material testing designs
- Custom software development associated with our equipment
- Custom developed circuit boards associated with our equipment

Installation Qualification/ Operation Qualification (IQ/OQ)

ChemInstruments is proud to offer equipment validation services for our full line of testing equipment including IQ/OQ. This on-site service includes documentation of the

IQ/OQ procedure, certificate of conformance, and certificates for all tools used in the validation.

A2LA Calibration Services

ChemInstruments in partner with Chemsultants International is proud to offer A2LA certified calibration services. This on-site service provides certified calibration / verification to the ASTM E4 standard. Calibration / verification service includes a full test report including as found, as left, and standard in tolerance determination.

A2LA calibration services are available on the following equipment:

- AR-2000
- PA-1000-90
- PA-1000-180
- LT-1000
- TT-1100
- HSR-2000
