

High Temperature 8 Bank Shear

Getting precise measurements every time with high temperature shear tests is easy with the ChemInstruments High Temperature 8 Bank Shear Tester. This device meets or exceeds numerous test methods, including PSTC-7 Procedure A & C, TLMI Test No. 7, FINAT test No. 8, and ASTM D 3654 testing standards, along with performing Procedure C for holding power of pressure sensitive tapes.

Additional features include the following:

Switches can withstand temperatures of 400°F (204°C) can perform shear tests in humidity chambers or freezers.

Additional features include the following:

- Rugged construction, capable of withstanding the abuse of a production environment
- Compact and easy to use
- Component design allows the switch unit to be separated from the timer control box by a 8' (2.5 m) high temperature cable
- Designed to use standard 2" x 3" (50 mm x 75 mm) format test panels

- Capable of holding panels up to 0.25" (6 mm) thick
- Switch unit components can withstand temperatures of 400°F (204°C)
- Mechanical switches can be calibrated to trip when using weights as low as 100 grams
- Adjustable feet to level the testing plane
- Adjustable panel rack marked for the standard 178° back tilt
- Easy-to-operate touch screen timer box records in minutes
- 85–265 VAC (50/60 Hz) with battery backup
- Operating temperature range of 32°–400°F (0°–204°C)
- Optional thermocouple accessory records failure temperature

Tape Specimen Cutter: A double razor blade specimen cutter slices samples to a precise 1" width. Other sizes available.

Test Panel: Standard size for all ChemInstruments Shear Testers. Items meet PSTC and ASTM specifications.

Shear Test Clip: Designed to evenly distribute weight over the width of the sample.

Hand Roller: Used to laminate samples to test panels.

Cutoff Fixture: Used to quickly and consistently create 1" x 1" sample for testing. Other sizes available.

Test Weights: Standard and custom sizes available.

Rolldown Machines

RD-1000
RD-3000

The Rolldown Machines laminates an adhesive coated material to a test substrate. The prepared sample can then be used in a number of different test procedures. The mechanics of the Rolldown Machine ensures that test samples are prepared at a stable laminating speed and with consistent pressure. The single roll version prepares one sample at a time, while the triple roll version reduces sample preparation time by accommodating three samples at a time. Both machines meet the requirements of PSTC Appendage B, Section 2.7, and ASTM D 3330 Section 5.4. The Rolldown Machines are a must for any development or QC laboratory that wishes to ensure the highest quality data through properly prepared samples. Additional features include the following:

- Rugged construction, capable of withstanding the abuse of a production environment
- Simple, one-touch operation creates repeatable test samples

- 4.5 lb (2 Kg) steel roll with Shore A scale 80 durometer rubber covering
- Steel roll is nickel plated to eliminate corrosion
- Rubber covering of 1/4" (6 mm)
- Finished roll dimensions of 1.78" x 3.75" (4.5 cm x 9.5 cm)
- Maximum roll of 10 lb (4.5Kg) (requires custom bracket)
- Selectable set speeds include older laminating speed of 12 ipm (30 cpm) and newer "harmonized" speed of 24 ipm (60 cpm)
- Accepts test panels up to 2" x 8" (5 cm x 20 cm)
- Adjustable stroke length of 1"-10" (2 cm - 25 cm)
- Capable of selecting of 1-9 repeat cycles
- Continuous cycling mode capability
- Operating temperature range of 32°-150°F (0°-70°C)
- Standard input voltage of 120 VAC (60 Hz)
- FINAT version available

Hand Rollers

HR-100
HR-102
HR-FINAT

4.5 lb Hand Roller & 10 lb Hand Roller

- 4.5 lb (2045 gram) roller features a steel core with a Shore scale A 80 durometer silicone rubber cover; 3.75" x 1.75" (95 mm x 45 mm)
- 10 lb (4540 g) roller features a solid steel core with an 8 RMS polished surface; 5" x 1.75" (127 mm x 45 mm)
- Legs on handle extend beyond the circumference of the roller to protect roller surface
- Slots on handle allow roller axles to "float" the weight of the roller during operation
- Meets the requirements of PSTC Appendage B, 2.8, and other industry standards

FINAT Hand Roller

- 2 Kg (4.4 lb) roller features a steel core with a Shore scale A 80 durometer silicone rubber cover
- 3.34" x 1.97" (85 mm x 50 mm)
- Legs on handle extend beyond the circumference of the roller to protect roller surface
- Slots on handle allow roller axles to "float" the weight of the roller during operation
- Meets the requirements of FINAT standard 2.1

Custom design rollers made to nearly any specification

Optional Certification Available

Rotary Die Slitter

RDS-100

Quickly produce consistent and accurately cut samples with the Rotary Die Slitter. The hand-operated machine safely cuts multiple straight and even samples efficiently and easily. Make this tool an integral part of your sample preparation for plants and laboratories.

Additional features include the following:

- Rugged construction, capable of withstanding the abuse of a production environment
- Uses a hardened rotary die for accuracy and durability
- Fully guarded with a narrow nip opening for safe handling
- Suitable for slitting material such as paper, film, foil, and laminates up to 9" (22.8 cm) wide and 0.060" (1.5 mm) thick
- Produce samples of unlimited length
- Produces six 1" (25 mm) samples and six 0.5" (12mm) samples
- Custom dies available to produce sample widths up to 9" wide
- Custom machines to accommodate greater widths available on request

Swing Arm Sample Die Cutter

DC-500

The Swing Arm Sample Die Cutter is ideal for producing samples from paper, film, foil, label, tape, and other materials. The Die Cutter employs a safe, manually-operated, cam-actuated cutting stroke to produce samples with standard Steel Rule and Clicker dies. This simple machine eliminates the risk of injury associated with hammering hand-held dies when making samples.

Additional features include the following:

- Rugged construction, capable of withstanding the abuse of a production environment
- Quick and Easy-to-operate and maintain
- Upper platen dimensions of 8" x 8" (20 cm x 20 cm)
- Lower platen dimensions of 9" x 11" (23 cm x 28 cm)
- Durable and replaceable lower platen cutting pad made of nylon

- Easy adjustment for stroke and height changes
- Upper platen and leverage arm swing away for easy access during setup
- Mounts to work table for hazard-free operation
- Single cavity Clicker dies available in standard and custom shapes (not included)
- Multiple cavity Clicker dies available in custom shapes (not included)
- Various tolerance dies available of $\pm 0.005"$ – $\pm 0.015"$ (0.127 mm – 0.381 mm)

Specimen Tape Cutters

SC-100
SCF-100

These specimen tape cutters simplify cutting samples for ASTM, FINAT, PSTC Appendage B, 2.4, AFERA and TLMI procedures. Extra blades and custom sample cutters are available. Contact ChemInstruments for more information about custom designs.

Specimen Tape Cutters

- 1" Specimen Tape Cutter
- 1/2" Specimen Tape Cutter
- 24 Mm Specimen Tape Cutter
- 12 Mm Specimen Tape Cutter

Shear Cutoff Fixture

- Quickly and accurately cut a shear sample to a 1" x 1" (2.5 cm x 2.5 cm) contact area
- Meets the requirements of ASTM, FINAT, PSTC, AFERA, and TLMI standards
- 1/2" x 1/2" (1 cm x 1 cm) fixture available upon request

Accessories

Adhesive Remover

A unique water-soluble solvent-based cleaner of exceptional dissolving power.

ADH-REM

Double Sided Tape

A versatile two-sided tape used in conducting release and coefficient of friction testing.

DS Tape

TW-CAL Test Weight Calibration Set

This set, with hooks, includes a selection of weights from 10-1000 grams with NIST traceable certificate.

TW-CAL SET

Water Vapor Cup

The sturdy cast aluminum Water Vapor Cup is used in the test method standards PSTC-34 and ASTM D 3833 water vapor transmission, and PSTC-35 and ASTM D 3816 water penetration.

WV-100

Test Panels

The 304 stainless steel meets the requirements for ASTM A666, PSTC Appendage B, and AFERA specifications. The 18 gauge panels have a bright annealed finish and are cut to size for various test methods. All stainless steel panels are 0.047" (1.2 mm) thick.

Standard sizes include the following:

Loop Tack

TP-16: 1" x 6" (2.5 cm x 15 cm)

TP-13: 1" x 3" (2.5 cm x 7.5 cm)

Shear

TP-23: 2" x 3" (5 cm x 7.5 cm)

Adhesion

TP-25: 2" x 5" (5 cm x 13 cm)

TP-26: 2" x 6" (5 cm x 15 cm)

TP-28: 2" x 8" (5 cm x 20 cm)

TP-39: 3" x 9" (7.5 cm x 23 cm)

Specialized Panels*

Acrylic: 1/8" (0.3 cm) thick

ABS Plastic: 1/8" (0.3 cm) thick

Aluminum: 0.04" (0.1 cm) thick

Co-Polyester (PETG): 1/8" (0.3 cm) thick

Glass: 1/8" (0.3 cm) thick

High Density Polyethylene (HDPE): 1/8" (0.3 cm) thick

Low Density Polyethylene (LDPE) 1/4" (0.5 cm) thick

Plastics: 1/8" (0.3 cm) thick

Polycarbonate(PC): 1/8" (0.3 cm) thick

Polypropylene (PP): 1/8" (0.3 cm) thick

Polystyrene(PS): 1/8" (0.3 cm) thick

Polyvinylchloride (PVC): 1/8" (0.3 cm) thick

**Specialized Panels do not meet ASTM D 3330 Specs.*

Standard panel sizes, as well as custom dimensions, are available in the above materials.

Test Panel Holder: Wooden holder with 22 angled slots to hold panels between tests.

Dimensions: 16" x 3.5" (41 cm x 9 cm).
