

# HarperScientific Precision Hand Proofers

## Phantom™ Proofer

The Ultimate Proofer to Increase Press Room Efficiency

ChemInstruments is proud to provide the HarperScientific line of Precision Hand Proofers. Hand Proofers provide the ability to produce reliable production like coatings on a laboratory scale. All Proofers use HarperScientific's Platinum® laser engraved anilox rolls. With HarperScientific's doctor blade metering and rubber transfer roll you have the ability to match colors and produce precision coating samples in your lab.

- Make quick, accurate adhesive & ink coatings
- Easy clean up
- Multiple coating thicknesses
- Quick anilox roll change
- Lightweight one piece aluminum frame & construction

The full line of HarperScientific Precision Hand Proofers is now available through ChemInstruments including the following:

### Echocel Junior™

#### Traditional Hand Proofer

(Systems 1-3 for Water/Solvent Inks)
