## Product info sheet no. C 2.6 - "Light Version" **Humidity/-temperature sensors**

for use in air-conditioning systems, building services management systems and ventilation technology

## Humidity

Humidity
measuring range
sensing element capacitive FE09/4
accuracy at 23°C (73,4°F)±3 %RH (4060%rh)
at 23°C (73,4°F) ±5 %RH (otherwise)
working range
temperature effect typ. less 0.25%RH per °C/°F
minimum air speed (only for PL,KL) 1m/sec, 3ft/sec
Calibration
measuring medium
air, pressureless, non-corrosive, non-condencing
output 010V or 420mA
Temperature
measuring range
sensing element
accuracy (1040°C; 50104°F) ±1 °C; ±1.8 °F
calibration
output

power supply:
current output (KL) (PL) 1224VDC
load $\Omega = \frac{\text{supply - 10 VDC}}{\pm 50\Omega}$
0,02 A
ourrent output (MI)
current output (WL)
max. load $\Omega = \frac{\text{supply - 14 VDC}}{100000000000000000000000000000000000$
0,02 A
voltage output24V AC/DC ±10%
voltage output (duct-version)
1530V DC/24V AC ±10%
load (voltage output only)>10kOhm
ambient temperature KL,PL20+80°C (-4176°F)
WL
electromagnetic compatibility
Emitted interference EN 55011 cl. B
Noise immunity EN 50082-2
sensor tube
housing ARS light grav
housing ABS light grey protective system WL

# on, small hysteresis and good dynamic performance. **User instructions**

Description

Install these sensors at a place where characteristic climatic conditions occur. The wall-mounting sensors can be installed on flush-mounted sockets on installation systems and directly onto the wall. Avoid installing them close to heaters or windows or against outside walls.

These sensors have been specially adapted to the needs

They come in three series (the WL series for wall mounting, the KL series for duct installation and the PL series with a cable for suspension from any location). The KL and PL series are equipped with gauze filters as stan-

Use of capacitive humidity sensor elements is a guarantee of high long-term stability, resistance to dew formati-

of the ventilation and air-conditioning sector.

dard. Other filters are available on request.

The sensors with the connection cable can be suspended directly from the cable.

In principle, the sensors do not require any maintenance. However, the dynamic behaviour of the sensor may be affected if it is exposed to too much dust. In this case, clean the sensor element by blowing the dust off. In the case of the KL and PL series, clean the sensors by rinsing them carefully in distilled water. Never touch the highly sensitive sensor element.

Please consult the application instructions for the sensing elements (product info sheet no. A 1) or check with the manufacturer for further information which you need to bear in mind when using humidity sensors with capacitive sensing elements.

### Other signal output temperature

Weight		ca. 80g	ca. 330g	ca. 120g	

PL, KL (housing) .... IP54, sensor ..... IP20

This information is based on current knowledge and is intended to provide details of our products and their possible applications. It does not, therefore, act as a guarantee of specific properties of the products described or of their suitability for a particular application. It is our experience that the equipment may be used across a broad spectrum of applications under the most varied conditions and loads. We cannot appraise every individual case. Purchasers and/or users are responsible for checking the equipment for suitability for any particular application. Any existing industrial rights of protection must be observed. The perfect quality of our products is guaranteed under our General Conditions of Sale. Issue: September 2008 valid until 31.12.2009 C26\_E. Subject to modifications, current version available at www.galltec.de. This issue supersedes all previous technical leaflets.
